II. Capability Statement

1. Overview

Pro-Concepts, LLC is a Service Disabled Veteran Owned Small Business that specializes in advancing concepts in Program Management, Risk Management, Systems Engineering and Independent Assessments. Every corporate and government entity faces strategic objectives that are laced with hurdles that require balancing limited resources against potential rewards. Successful executives understand the objectives, concepts and interrelationships required to achieve the business and financial objectives. Pro-Concepts experts work hand in hand with them to provide the right services and products at the right time to achieve their business objectives and goals. Our proven expertise provides the foundation for our worldwide recognized risk management applications called **“Risk Radar® Enterprise” and “Risk Radar® 2012”**.

We serve a diversified federal and industry base of large and small companies located nationally and worldwide, who are involved with building, designing or running complex systems, products and services. Among the government and industries we serve are:

- Department of Defense Components
- Departments of the Navy, Army and Air Force
- Federal Departments and Agencies
- State governments
- Aerospace Industry
- Power Generation & Utilities Industry
- Health Care Industry
- Federal Banking
- Hospitality Industry
- Command, Control, Communications, Computers and Intelligences (C4I)
- Transportation Sectors
- Railway infrastructure companies
- Telecommunications

Pro-Concepts LLC (Pro-Concepts) is an experienced consulting firm specializing in the creative application of leading edge IT Project Management, Risk Management, Systems Engineering and Independent Assessment Services. Our clients are responsible for the acquisition, development, integration, and migrating of complex programs and systems. We provide government and commercial organizations with professional consulting and support services that are based on proven best practices to help them achieve their short- and long-term business objectives.

Our skills and experience are based on the understanding that even exceptional projects need help from time-to-time. In today's corporate world, companies are merging and downsizing, forcing organizations to quickly adapt to constantly evolving requirements. In these situations, Pro-Concepts helps resident staffs seamlessly meld system software, hardware, and processes into fully integrated and productive business environments. Additionally, we provide specific training to ensure that your staff stays abreast of the latest consensus standards and best practices. At our core, we bring an impartial set of experienced eyes to help you build on the strengths and reduce the weaknesses of your environment. We help your staff develop and retain their edge in providing your organization and clients with outstanding services and expertise.

With more than a decade of front line experience, we offer a unique blend of full-service support that includes expert hands-on consulting, on-site staff support, and specialized training, all of which are tailored to our clients' evolving project requirements. We eagerly embrace the challenge of making our services and best practices work to the competitive advantage of our valued clients.

Our unique Risk Radar software is designed to **increase the visibility** of project risk by helping a manager determine the best way of identify, analyze, track, mitigate, and control project risk. **Risk Radar® Enterprise is the only risk management software approved to be installed on the Navy Marine Corps Internet (NMCI) network. The US Army also granted us authority to operate Risk Radar Enterprise on the US Army Enterprise Network.**

Our subject matter experts and risk management software provides pro-active visibility for uncovering, scoping and managing program uncertainties, as well as discovering unforeseen problems that can stall or end a project, or add hugely to the budget.

We provide unbiased evaluation and recommendations to reduce the uncertainties a leader or team faces in meeting their business objectives. And, we provide our services with unquestionable integrity and ethics.

Because of technology and the ease of communications, teams are now assembled from across the nation and world. The pitfall is that everyone is not always on the same page. Our software connects the team and ensures everyone is communicating clearly so that risk is mitigated or completely eliminated.

III. Products

Risk Radar® Enterprise (RRE)

- Pro-Concepts is the sole developer and supplier of this software.
- Web-based application designed to encourage and facilitate proactive risk management and communication within a multi-project, multi-tiered Enterprise Risk Management system.
- Easy to use. Upon installation, RRE can be utilized immediately with no required training.
- Risk Radar is the only Risk Management Application approved to be installed on the Navy Marine Corps Internet (NMCI) network.
- US Army granted RRE an Authority to operate on the US Army Enterprise Network.

Risk Radar® 2012

- Pro-Concepts is the sole developer and supplier of this software.
- A self-contained, browser-based application with familiar browser navigation patterns.
- Easy to use. Upon installation, Risk Radar can be utilized immediately with no required training.
- Contains a customizable Risk Matrix, drop down menus, reports and more.
- Supports management of risks for one project by one user using a single PC/workstation installation.
- Supports required data security in secured environments.

IV. Services

- Risk Management
- Program Management
- Systems Engineering
- Independent Assessments

V. Teaming & Subcontracting
